

KMSnano v10 Automatic Really Final Last Release

This is a portable Key Management Service (KMS) Host for Windows (client) 6.0, 6.1, and 6.2, and for Office 14 and 15.

It is a virtual machine that runs within Windows and activates Volume License versions of Windows (client) and Office for 180 days.

Important: Better disable the automatic windows update, we never know.

- Requirements: .NET 4.0 or Windows 8.

- Activates Windows Vista/7/8 Pro/Enterprise/N/VL and Office 2010/2013 Retail/VL.

1. Double-click on KMSnano.exe. (برروی KMSnano.exe دوبار کلیک کنید.)
2. Wait for the files to decompress. (منتظر بمانید تا فایل مورد نظر از حالت فشرده خارج شود.)
3. Wait for activation process to finish. (منتظر فرآیند فعالسازی به منظور تمام شدن برنامه بمانید.)
4. Done. (انجام شد.)

Based off of Ratiborus's KMSmicro v3.10. (مبتنی بر Ratiborus's KMSmicro v3.10.)

To see the Log file check: (برای مشاهده فایل Log را بررسی فرمایید)

%Temp%\KmsNano.log

Should you run into trouble: (اگر در حین اجرا به مشکل برخورد کردید)

خارج کنید "Manual.cmd" را اجرا کنید (Decompress KMSnano.exe with 7-Zip and run "Manual.cmd")
(از حالت فشرده فایل KMSnano.exe و سپس

If you used a hacktivation on your installation before:

Decompress KMSnano.exe with 7-Zip and run "Fix hacktivations.cmd"

In case you used a retail key and you want convert to Windows VL:

Decompress KMSnano.exe with 7-Zip and run "Convert_Windows_Retail2VL.cmd"

In case you want do everything manually, check the *.cmd scripts inside; they work without .NET Framework 4.0.

=====

KMSdrunk v6 Automatic Really Final Last Release

This is a portable Key Management Service (KMS) Host for Windows (client) 6.0, 6.1, and 6.2, and for Office 14 and 15.

It is a virtual machine that runs within Windows and activates Volume License versions of Windows (client) and Office for 180 days.

Function-wise, KMSdrunk is the same as KMSnano. KMSdrunk, however, is compressed differently.

Important: Better disable the automatic windows update, we never know.

- Requirements: .NET 4.0 or Windows 8.

- Activates Windows Vista/7/8 Pro/Enterprise/N/VL and Office 2010/2013 Retail/VL.

1. Double-click on KMSdrnk.exe.
2. Wait for the files to decompress.
3. Wait for activation process to finish.
4. Done.

Based off of Ratiborus's KMSmicro v3.10.
